### CHAOSS Goals

Develope programs for measuring community health

### Spreading CHAOSS

The CHAOSS project was officially announced at the Open Source Summit North America 2017 in Los Angeles

## How to Participate

## How to Participate

The CHAOSS community is dedicated to fostering an open and welcoming environment for contributors. Anyone can join the mailing list, participate in Zoom meetings, or contribute to any of our projects at any time!

## We can help you to grow your business

Unhealthy projects have negative impacts on the community involved in the project as well as organizations that rely on such projects. The CHAOSS project develops metrics, practices, and software for making open source project health more understandable. CHAOSS seeks to improve transparency and actionability of open sourceproject health so that relevant stakeholders can make more informed decisions about open source project engagement
